

TOTAL
RECYCLING SERVICES
WASTE MANAGEMENT INNOVATION

Our Services

About Us

Total Recycling Services combine a unique in depth knowledge of both hazardous and non hazardous waste disposal, having brought together directors, managers and key personnel from both industries.

By combining this experience with expert knowledge of environmental best practice, we are able to provide a professional approach to waste management and recycling services.

We assist our customers in applying the correct waste hierarchy of waste prevention, minimisation, reuse and recycling.

We offer a total waste management package that is both environmentally friendly and highly compliant with waste management regulations. We use our industry experience to bring our innovative ideas to life, resulting in long lasting relationships with our happy customers.

Total Recycling Services are accredited to ISO14001 Environmental, ISO9001 Quality and OHSAS18001 Health & Safety Standards. The standards are audited annually by the NQA Global certification body.

Operating our purpose built waste management facility under ISO accredited management systems means that trained staff are storing & handling varied waste streams safely, in a controlled and monitored environment at all times.

A full audit trail for all hazardous movements is maintained by the strict policies, procedures and systems that we have in place.

More in depth information of our systems and procedures can be found by visiting our website where certificates and documentation are available to download.

“ As a company, we are extremely proud of what has been achieved here at Darlington in a relatively short time. It stands as a great credit to all our staff who have worked very hard to get us where we are today. ”

Total Recycling Services offer

- A reliable collection service for cardboard, papers, plastics, metals & other recyclable materials using our own fleet of vehicles
- Our own permitted recycling and distribution facilities
- Specialist recycling equipment including industrial balers, shredders and plastic granulators
- Account management and custom reporting
- In depth knowledge of waste hierarchy, waste minimisation, duty of care & best practices
- An established network of recycling outlets to facilitate competitive rebates for recyclable material

“ Our quality rating for export is amongst the highest achievable. ”

Recycling Services

We run a flexible recycling collection service from our two distribution centres in Darlington.

We have the expertise and equipment required to collect and recycle large quantities of recyclable materials including papers, metals, cardboard and plastics. We can help increase the recycling rates of your waste materials and maximise potential cost savings from effective segregation and recycling.

Increasing rates of recycling and minimising carbon footprints are paramount in our approach.

We can collect recyclable material and deliver it to our recycling facility where it will be sorted, segregated and baled for re-processing in the UK and for export. Our quality rating for export is amongst the highest achievable.

We offer very competitive rebates to our customers for good recyclable materials and we can also offer an on-site service providing the necessary equipment and manpower to help you manage recyclable waste at your facility.

Hazardous Waste Recovery

Total Recycling Services owns a fleet of specialised vehicles operating from a purpose built hazardous waste management facility in Darlington. Our staff have extensive experience in hazardous waste recovery and disposal.

The 55,000 sq. ft. facility is run in accordance with our environmental permit and ISO accredited management systems. We are fully accredited with WAMITAB certifications in both

treatment and transfer (4TMH and 4TSH). We can use our expertise to guide you through the hazardous waste regulations and advise on waste classification, waste acceptance criteria, WEEE Regulations, CDG/CP and ADR.

We provide pre acceptance and consignment note documentation for all hazardous waste loads that we collect. We can also provide customised reporting detailing all hazardous waste removed.

Total Recycling Services offer:

- A flexible collection service from our range of specialist vehicles
- A permitted hazardous waste management facility operated in accordance with ISO accredited management systems
- Expert knowledge of hazardous waste legislation and environmental compliance
- Cost effective waste recovery & disposal
- Access to our own laboratory and testing facilities, managed by our on-site chemists
- Bespoke state of the art drum decontamination unit and recycling facility

“ We operate a bespoke drum decontamination unit and plastic shredding and granulation plant.

Use of the plant increases the potential to comply with the waste hierarchy and provides a genuine recovery route for containers that formally contained chemicals. ”

Industrial Services

We offer an extensive range of industrial service packages including the cleaning of grease traps, site surfacing, drainage systems, interceptors and storage tanks.

High pressure water jetting to facilitate internal cleaning of tanks, pipework and industrial surface cleaning is also available - we can also provide a tanker service to take away any waste generated during the process.

All our industrial cleaning activities are run in accordance with an integrated management system that incorporates ISO9001 Quality, ISO14001 Environmental and OHSAS 18001 Health & Safety Standards.

Our teams operate with strict adherence to health & safety standards, with a strong focus on safe working practice including confined space and BA entry.

Total Recycling Services offer:

- Our own hot jet, high pressure and spinning equipment
- A dedicated team to plan and manage the work
- Provision of method statements and formal risk assessments
- Client involvement in all stages of the planning and operational processes
- A certified, competent and experienced workforce
- Safe working practices and adherence to safety standards
- Recovery and disposal for waste generated from the activity via our ADR tanker service

|| Cleaning activities are ran in accordance
with ISO accredited management systems ||

Tanker Services

We have a range of bespoke ADR tankers that are able to transport hazardous liquids including highly corrosive materials with the use of rubber and glass lined barrels.

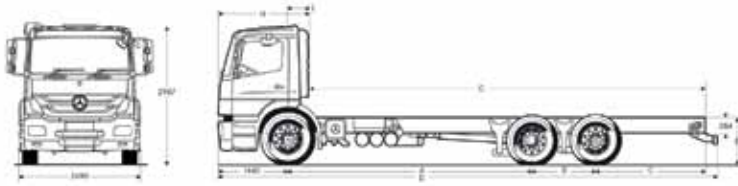

Tanker support is also available for spillage response and for our industrial cleaning crews. We can safely transport your waste chemicals to our facility for recovery or disposal.

In addition to the tankers we have a growing fleet of hook lift vehicles for skip collections and curtainsiders for transporting contained waste streams.

All of the vehicles in our fleet have been purchased new from Mercedes. Our clients can be confident knowing that their waste is being transported in a safe and efficient manner and we can be confident that our drivers are using the best available equipment.

// Our clients can be confident knowing that their waste is being transported in a safe and efficient manner and we can be confident that our drivers are using the best available equipment. //

The Mercedes Actros, "A benchmark in long distance haulage".
